New Patent Drawing Correction Procedures

Drawings charged out from the Patent and Trademark Office, for the purpose of making changes or corrections, will be released from the Drafting Branch after the mailing of the Notice of Allowance. Most drawings should be available for charge out one week to ten days after the Notice of Allowance mail date. The major exception to this procedure will be when the examiner requires that drafting corrections be made prior to the Notice of Allowance issuance. We anticipate that this exception requirement will occur only for Design applications being appealed.

Unless a duplicate copy of the Drafting Letter has been filed by the attorney/applicant, the Office will not normally provide the commercial bonded draftsman with copies of either examiner approved drawing correction letters or a copy of the Patent and Trademark Office draftsman's noted informalities. It is the applicant's responsibility to provide copies of the necessary drawing corrections and the noted informalities. When drawings are borrowed from the Office draftsman, the serial number, batch number, and Notice of Allowance mailing date should be identified.

If for any reason a corrected and/or substitute drawing is not acceptable, a letter will be sent to the attorney/applicant. A bonded commercial draftsman

must present a copy of this letter in order to borrow the unacceptable drawings.

THERESA A. BRELSFORD,
June 28, 1982. *Acting Assistant Commissioner for Administration.*

Automated Search Experiments

Research and evaluation projects dealing with 1) automated full text searching of U.S. Trademarks, 2) automated phonetic searching of U.S. Trademarks, 3) automated prefix/suffix searching of U.S. Trademarks, and 4) automated searching of design marks. To further this objective, the PTO has entered into an agreement with CSG Corp. and Pergamon International Information Corp., to provide the PTO access to and support for the use of their trademark searching systems. Using these systems, the PTO will test and evaluate the effectiveness of searching the full text of up to 80,000 U.S. Trademarks and up to 6,000 design marks. As part of this experiment, the PTO will furnish a special compilation of tapes containing the full text of pending U.S. Trademarks, and a special compilation of copies of design marks, suitable for filming.

The PTO would welcome multiple experiments using the same or similar techniques and/or technology, and thus the PTO is willing to enter into the same agreement, or a similar agreement on mutually agreeable terms, with any other responsible party, within 60 days from the date of this notice. Additional information regarding this matter may be obtained from:
